Mobile Beacon’s i3 Internet Inclusion Initiative is part of our mission to make broadband affordable and bring equal educational opportunities to all. By pairing Mobile Beacon’s $10 per month service with no-device donation programs, we help schools get the Internet access they need and extend it to people who need it most.

ACCESS MORE, TEACH MORE, LEARN MORE WITH UNLIMITED DATA.

We help schools:
- Provide out-of-school access to students who do not have Internet access at home.
- Offset some E-rate funding gaps.
- Create a low-cost, back-up Internet source so lessons aren’t interrupted by slow speeds or a lost connection.
- Offer affordable, out-of-school, mobile Internet access to teachers and staff to increase professional development opportunities.
- Create instant wireless access in unconnected areas of your school building.

We're a nonprofit dedicated to providing affordable, mobile, high-speed Internet access to schools, libraries and the communities they serve.

For too many students, this is an everyday reality.
OPEN INTERNET

Today’s schools need high-speed broadband to deliver 21st century learning skills. However, research shows one of the greatest barriers to access is the cost. As one of the largest national education broadband service (EBS) providers in the U.S., we are able to make broadband more affordable for schools. Our mobile, high-speed service helps schools address their in-school and out-of-school connectivity needs.

Affordable Access

Unlimited 4G mobile Internet data plans for just $10/month.

Donated Hardware

Donation program through Digital Wish further reduces your startup costs.

Mobility

One mobile Internet service enables learning anywhere, anytime!

Save up to 80% annually!

Annual Cost for Data Plans for 10 Mobile Hotspots:

- Create instant wireless access in unconnected areas of your school building.
See how we helped CA’s Burton School District (BSD)
K–12
BSD serves many families that migrate to follow seasonal job opportunities. As a result, about 25 percent of their families do not have home Internet access. For the 2014–15 academic year, Burton Middle School implemented a 1:1 initiative and each student was given a Chromebook with a built-in data connection. Initially, Internet access was funded by E-rate, but their funding was cut mid-year.
Mobile Beacon provided 150 modems for the rest of the school year, saving the heart of the program and enabling the 1:1 program to continue. Burton School District plans to expand this program to other schools.

See how we helped RI Family Literacy Initiative (RIFL)
Adult Learning
RIFLI is an adult education agency serving primarily immigrants that offers programs ranging from beginner English as a Second Language (ESL) classes to Career and College Transitions preparation. But one third to one half of their students didn’t have Internet access for homework and skills practice between classes.
Mobile Beacon provided low-cost mobile Wi-Fi hotspots that RIFL students borrow for the duration of classes. Students are now passing digital literacy assessments at a faster and higher rate than before the device lending, and feedback continues to be tremendously positive.

Not only are students who lack access at home struggling to keep up, their lack of access is holding our education system back. It means too many young people will go through school without fully developing the skills that give them a fair shot in the digital age.
