

How MB Supports Schools During COVID-19 **PANDEMIC BY THE NUMBERS**

1,422

Schools served in
46 States + DC

235%

increase in mobile
hotspot donations

\$421,965

donated to schools
during the pandemic

Unlimited data plans continue to meet the increased demand for data-intensive applications like video conferencing during remote learning

It has been great having Mobile Beacon especially during this Pandemic we are facing, Keondra Whaley a Science Teacher at Wicomico High School said. I have been able to work from home without interruptions during the school day.

This allows me to interact with my students daily through Zoom meetings, Google Classroom, and email. Not only can I connect with my students, but I was also able to connect with my school and district while learning new programs to use for remote learning.

45%

increase in data
usage from last year

3,523,000+

GB of data used by
schools in 2020

One of the best things we did with Mobile Beacon wi-fi hotspots is to take 5 of them and pair them up with 5 Chromebooks and create High School Completion Kits for people to check out on extended loan to study for the HiSET test to get their high school equivalency. It has taken a while to get the word out, but now with COVID-19 we are getting more calls about our kits and how people can use them to study for the test safely from home."
